

**Supplementary Figure S1.** Number of dasatinib prescriptions summarized according to patient age and sex. We determined the number of prescription drugs using the data from the 5<sup>th</sup> National Database of Health Insurance Claims and Specific Health Checkups of Open Data from 2018 (<https://www.mhlw.go.jp/ndb/opendatasite> accessed on December 31, 2021). The number of dasatinib prescriptions issued is shown according to age group and sex.

All values are  $\times 10^6$

0–19 years: male 47.564; female 8.342

20–29 years: male 147.583; female 51.074

30–39 years: male 273.005; female 85.875

40–49 years: male 469.847; female 168.206

50–59 years: male 486.997; female 241.34

60–69 years: male 513.684; female 338.88

>70 years: male 480.341; female 357.647
