Abstract (en)
[origin: WO2010066544A1] The invention relates to an assembly tool for the assembly of pegs (30), comprising a plate (31), a peg sleeve (32) and an expansion element (33) in an insulation and a substructure having a base element (1,10) and a piston element (4, 14) movable in the base element. The piston element is fastened in the base element by means of a coupling element (6) up to the limit of a predetermined force or the piston element is fastened to a second securing means (3) within the base element by means of a first securing means (16,17) up to a stop thereof. The invention also relates to a corresponding method.
